

Reject Systems

Drop Flap

Suitable for dry products in bulk, active flap will open and drop unsuitable product from the product stream.

Gravity Flap

Suitable for dry bulk products in a gravity feed system, active flap will open and divert contaminated product from the product stream.

Drop Flap II

Suitable for dry products in bulk, reject flap will open to redirect contaminated products from the product stream.

Air Blast

Suitable for high-speed sorting of small and light weight products, a powerful air stream is used to divert contaminated product from the product stream.

Side Flipper

Suitable for boxed and bagged products, unsuitable products are directed to an alternate route out of the product stream by 1-2 arm levers.

Bidirectional Pusher

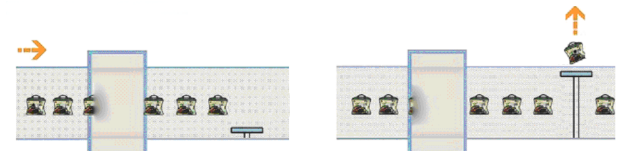

Suitable for small and large packaging, cylinder will push contaminated products from the product stream.

Pneumatic Retracting Band

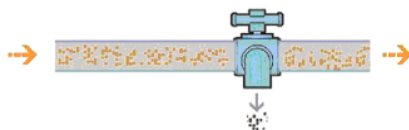

Suitable for small packaged and unpackaged products, belt retracts to remove contaminated products from the product stream.

Pusher

Suitable for small and large packaging, cylinder will push unsuitable products from the product stream.

Butterfly Valve

Suitable for fluid and semi-fluid, valve opens and closes to release contaminated product from the product stream.
